

I want you to know how very important 88.5 K-LOVE is to me and my family. It is on my radio in the car, in the house. My kids listen to it in their cars. There is very little selection of radio stations that you can put on in the car and not have to worry about the content and language. If this station was taken away I would be very unhappy and I plan to let as many people as possible know of this so that they can send their comments also.
